

 **Cubetas GN acero inox.**

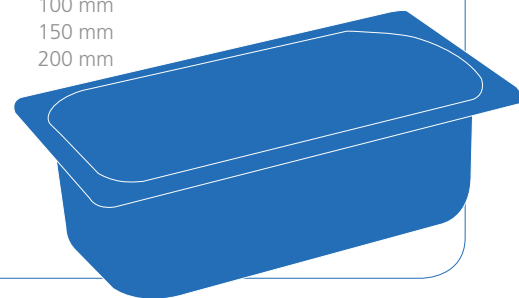

**ANGULACIONES REFORZADAS:** Con el fin de aumentar la longevidad de las cubetas, se han hecho rígidas angulaciones con un forjado destinado a atenuar las deformaciones durante las caídas, choques, etc. Esta nervadura mejora la estética de las cubetas, particularmente durante su utilización en autoservicio. No tiene ninguna incidencia sobre el mantenimiento de las cubetas y no estorba lo más mínimo para colocar la tapa para apilarlas, y se puede utilizar sin problema sobre un carro con guías, autoservicios, etc.
